Environmental Policy

The Company operates within the heart of West Yorkshire (Lockwood, Huddersfield) and has been established 19 years.

Provision manufacture and installation of Steel security and sheet metal fabrication and bespoke items as directed.

The Company recognises that its products and processes create an impact on the environment. It is committed to improvement by the following measures:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its fleet vehicles.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Develop and promote a product range that minimises the environmental impact of both production and distribution.
- Be fully compliant with all relevant legislation and regulations and codes of practice.
- Prevention of any environmental impact and pollution through the controls and management in the manufacturing process.
- Ensure **all** employees are aware of the Policy and adhere to agreed principles and practices through training and briefing.
- Setting key objectives and targets which are realistically attainable – review and adjust as required to meet the needs as identified.
- Make this policy available to all.
- Take account of all interested parties i.e. Regulators, shareholders, employees, clients, customers and the public.
